# SCHOOL DISTRICT NO. 36 (SURREY)

No. 5702

**POLICY:            RECYCLING & DISPOSAL OF  
                          CONSUMABLE LEARNING  
                          RESOURCES**

---

The Board recognizes the desirability of supporting environmentally sound practices and maximizing the utility of all resources in the district and in the community. It is the intent of the Board that district policy and procedures support re-use, recycling and responsible disposal of all print, non-print or media learning resources and other salvageable waste materials of a consumable nature.

The responsibility for achieving this objective is delegated to school and district administrative officers who are responsible for the proper selection, circulation, and disposal of textbooks, recommended learning resources, library books and other consumable resource materials assigned to their schools or facilities. The Board supports the carrying out of this responsibility through the provision of the human and financial resources required.

Adopted:            1992-11-12
