
SCHOOL DISTRICT NO. 36 (SURREY)

No. 9610

POLICY: TREATMENT OF STUDENTS WITH MEDICAL PROBLEMS

The Board of School Trustees seeks to provide a level of supervision and care that will secure the safety and well-being of students with medical problems. Parents/guardians are encouraged to administer medication at home, but if that is not possible district and school administrators are expected to ensure that procedures are in place to accommodate the needs and care of students who require or might require treatment of medical problems.

If a student having a medical problem that requires, or might require emergency treatment is to be enrolled in school, a signed statement by the student's parent/guardian stating any recommendations, is to be made available. If necessary, the level of supervision and possible treatment is to be determined at a meeting attended by the parent or guardian, the principal of the school, the Medical Health Officer (or nominee) and (if applicable) any other member of the school staff who would be actively involved with the student.

Where required, staff will be offered training to ensure adequate supervision and treatment.
