

Planning

What is Health? Poster

Step 1: In your own words, define the word "health". Place this definition at the top of your poster.

Step 2: Now, create a web that outlines the different forms of health. Include as many as you can think of (eg: physical health). Use drawings to help represent each of the forms

Step 3: Now, add FACTORS that affect health (positive or negative), and connect the factors to the various FORMS. Use drawings to help represent each of the factors. You should have at several FACTORS for each FORM and some of your FACTORS may connect to more than one of the FORMS.
