

Education Week

Celebrate the care and commitment teachers, students, boards and communities give to their local schools. During Education Week, the Surrey School District is highlighting schools initiatives and achievements.

The goals of Education Week are to:

- Demonstrate the importance of education as the foundation of British Columbia's social and economic future.
- Recognize and appreciate the dedication of all school staff, both teaching and non-teaching.
- Provide an opportunity to promote awareness of contemporary teaching and learning activities.
- Bring together all sectors of society to reaffirm a common commitment to the welfare of children and to recognize the value of a quality education system in preparing children to assume social responsibility in a participatory democracy.
